

I am a native of Sanpete County. I graduated from Manti High School, Snow College and Utah State University. I also have a Law Enforcement Leadership Certificate from the University of Utah. I have 13 years experience in the Criminal Justice field. During that time I have worked many different assignments and investigated all types of crimes. I have been an instructor for many types of law enforcement training including firearms, active shooter response and crime scene.

I believe in building strong working relations with other agencies and volunteer programs. This allows good team work to provide service for the communities we live and work in as well as reducing the duplication of services. I also believe there are ways we can improve the service provided by the Sheriff's Office and spend less in the process.

I am a strong supporter of volunteer services in our communities. I have been involved in Emergency Medical Services in Sevier County, Millard County and Lake Powell as an EMT. I was also a member of the Sevier County Search and Rescue and held leadership positions there.

My own experience has led me to a strong belief that one of the best ways to improve law enforcement is to incorporate those providing service into the communities. Together we can achieve great things for Sanpete County.

My father has said "The world is run by those who show up." I believe that is true and I encourage everyone to show up and vote.
